Make this well cared for American Foursquare classic designed by Albert Lang your home. Notable for its attractive pagoda styled slate roof and its screened-in front porch, this family home has a very livable floorplan: a gracious living room with fireplace that opens to a formal dining room w/oak wainscoting, woodwork & built-in china cabinet. Hardwood floors under the carpets on 1st floor & lovely hardwood floors on 2nd floor. The eat-in kitchen has ample oak cabinets & an original white oak butler pantry. The home has four sizable bedrooms on the second floor, w/ generously- sized closets & three full baths. There is a master bedroom, w/ a walk-in closet & ensuite bath. Two half baths: one on the 1st floor & one in the finished basement, that provides additional room for family fun & home projects. The large yard is very well maintained w/ a two car garage & one BR apt. above, providing monthly income. Close to everything Hyde Park has to offer.
